

Health Needs Assessment Questionnaire. Year 9 (Secondary School)

Information for head teachers.
Version for September 2020

The school nursing services have worked with colleagues in the Lancashire County Council (LCC) Public Health and School Improvement Services to develop a Health Needs Assessment Questionnaire for year 9 pupils via a secure LCC web platform. The pupil responses from the collated questionnaires will generate:

- A summary report for the school that will provide the school with information about the health needs of its pupils, which can inform the PSHE curriculum and pastoral support. School nurses will have access to the school report and may be able to provide some associated advice to schools
- An individual report for each pupil, accessed only by school nurses, to identify and address individual health needs, so the school nurse can offer targeted follow-up. This may also inform the CAF process
- Information for Lancashire County Council to include in population health needs assessments and inform future provision for children and young people in Lancashire

The contents of the questionnaire are outlined below.

Welcome

This questionnaire asks you about your health and lifestyle.

Your honest answers are very important.

There is no time limit to complete the questionnaire.

Please pick the answer that is closest to how you feel.

If there are any questions you don't want to answer then you can leave them blank and move onto the next.

If you need any help please ask your school nurse or teacher. But remember to **give your own answer, not what you think you should say.**

Only the **school nurse will be able to see your answers** to the questions. If there are any **responses that suggest you may need their support, they may contact you individually.** They will always act in your best interest.

If the school nurse feels that your answers show a **risk** to your safety or protection (or someone else's) they may have to share this with some other people to help you.

Your school will receive a report that summarises the responses of everyone at your school. They could use the report to decide what needs to be included in your PSHE classes.

Questionnaire

Secondary Health Needs Questionnaire

Q1. Being active: About how many days a week do you spend doing 60 minutes or more of physical activity?

This can include swimming, dancing, running, or walking fast, as well as playing sports like football, netball and cricket.
